Brahim EL BANAJI

Java Full-Stack Developer Angular|React.
Oracle Certified Associate Java SE8.
Actively seeking challenging opportunities in Java Full Stack development.

CAREER OBJECTIVE

Autonomous, passionate about Web development and new technologies, interested in Java and its modern Spring Boot Framework, I aim to put my skills at the service of a company with an innovative, enthusiastic and daring culture. Thanks to an in-depth training course and a wealth of professional experience, I have become an expert in the design and adaptation of sites and web applications.

PROFESSIONAL EXPERIENCE

2022-2023: Schoolify.ma– JAVA Full-Stack Developer Angular (Freelance project)
- Design and development of an online learning solution organized remotely on the web.
- GED: Development of an Electronic Document Management micro-service.
- Development of the user interface (UI) of the application.

2022-2023: Video-Conference WebRTC – JAVA Full-Stack Developer Angular (Freelance project)
- Design and development using Java for the implementation of real-time communication functionalities via WebRTC.
- Integration of advanced features such as screen sharing, live chat and user management, using WebRTC.

2022-2023: Hallaoui– Unit Test Developer React js, Jest, RTL (Freelance Mission)
- Development and maintenance of unit tests for React components, covering all usage scenarios.
- Using Jest and RTL to write automated tests.
